“FNSS MAV” deliveries to Turkish Naval Forces Command, Amphibious Marine Brigade has started

The first delivery of the Armoured Amphibious Marine Assault Vehicle (MAV) to the Turkish Naval Forces Command, Amphibious Marine Brigade announced on March 25, 2023. MAV is developed within the scope of the Turkish Defence Industry Agency (SSB) program to meet the amphibious armoured vehicle needs of the Turkish Naval Forces Command. FNSS will deliver a total of 27 vehicles, 23 of which are personnel carriers, 2 command and control vehicles and 2 recovery vehicles.

MAV has higher ballistic and mine protection compared to its predecessors and is equipped with today's most advanced mission equipment. Dual role by definition, the MAV offers high performance both on land and water operations. Very few countries have this capability in inventory and FNSS is the only supplier in NATO within an operating production line to produce type of vehicles.

MAV outperforms its predecessors in terms of;

- Number of personnel to be transported in the vehicle,
- Ballistic and mine protection levels,
- Performance criteria to be met on land and in water and
- New generation remote controlled turret.

MAV is fitted with CAKA Remote Controlled Turret with the ability to carry a maximum load of ready-to-fire rounds and ballistic protection. FNSS CAKA RWS offers grater advantages with its; light weight, better protection for the gunner, target acquisition, automatic target tracking, stabilisation, reliability, accuracy and increased usable internal volume inside the vehicle.

MAV have all the features and capabilities of both a military land vehicle and a military marine vessel, by balancing the land and sea requirements. FNSS is breaking new ground with MAV which is the first and only amphibious vehicle in Turkish Armed Forces inventory that is capable of self-righting in case of capsizing and operating at sea in harsh weather conditions.

The new MAV’s entering in service will operate within the new landing helicopter dock (LHD) TCG-ANADOLU of the Turkish NAVY.

PROTECTED MOBILITY AT YOUR SERVICE!

A GLOBALLY TRUSTED AND RESPECTED TURKISH DEFENCE COMPANY

FNSS is a globally recognized land systems company that specializes in designing and producing wheeled and tracked armoured combat vehicles as well as combat engineering vehicles, turrets and sustainability solutions. As the preferred solution provider of users in various countries, the Company has delivered thousands of armoured combat vehicles worldwide.

ADDING VALUE THROUGH INNOVATIVE SOLUTIONS

Thanks to its competent and dynamic workforce, FNSS offers innovative solutions throughout the entire product life cycle; from the design phase to the end of service life. Ever since the first roll-out in 1990, the Company has continuously improved its vehicle design and production capabilities in line with the requirements of its users. FNSS' KAPLAN class tracked armoured product family and PARS wheeled armoured vehicles are poised to shape new generation combat vehicle trends well into the 21st century.

MEETING USER EXPECTATIONS

FNSS designs and develops customized solutions to meet the requirements of each user. The key to FNSS' success in delivering tailored products within requested time frames lies in its flexible approach to project management. This is complemented by its ability to orchestrate an extensive supply chain and a wide range of global partnerships. FNSS has successfully engineered and supplied numerous products addressing unique requirements. These vehicles have been designed, manufactured and delivered to armies worldwide by FNSS' user-centric business models and tailored solutions.

BUILDING THE FUTURE WITH CONFIDENCE

FNSS products have been challenged by countless user endurance tests in the toughest conditions, and have proven themselves in combat missions. FNSS views user satisfaction as a permanent concept, and strives to ensure that its products serve beyond their life cycles by addressing any emerging needs throughout their use. FNSS also makes a difference by generating significant value for its international users through localization packages that include employing local labour, establishing domestic supply chains, and providing in-country training and technology transfer. Building upon it's over 30 years of heritage in the defence industry, FNSS continues to add value to its users by creating innovative solutions.
