PRESS RELEASE

May 14th, 2025

TSD, Groupo Oesía, FNSS, and John Cockerill Defense Sign a Memorandum of Understanding for the Supply of a 6x6 Cavalry Vehicle for the Spanish Army

The four companies intend to collaborate by providing expertise in the following areas:

- Vehicle manufacturing and assembly
- Armoured vehicle design
- Optronic vehicle supply
- Manned turret assembly and integration

With this offer, the four companies aim to provide the Spanish Army with a military on-the-shelf solution, including local integrated logistic support and lifecycle management.

Strategic Collaboration

TSD is a Spanish company active in the design, development, and manufacturing of military vehicles. Over the last 25 years, it has been present in both the Spanish and export markets, with over 15.000 vehicles delivered and in service.

Groupo Oesía is Grupo Oesía is a 100% independent, private and Spanish multinational specialized in dual-use digital and industrial engineering. In its commitment to hyper specialization, it has 5 brands, each an expert in its area: Oesía Networks (digital transformation); Tecnobit-Grupo Oesía (cutting-edge technological products and solutions in intelligent vision, simulation, and secure tactical communications); Cipherbit-Grupo Oesía (cybersecurity and secure communications (encryption)); UAV Navigation-Grupo Oesía (guidance, navigation, and control systems for unmanned aerial vehicles); and Inster-Grupo Oesía (technology for terrestrial, naval, aerial, and space satellite communications).

FNSS is a globally recognized land systems company that specializes in designing and producing wheeled and tracked armoured combat vehicles as well as combat engineering vehicles, unmanned ground vehicles, hybrid powertrains, turrets and sustainability solutions. As the preferred solution provider of users in various countries, the Company has delivered thousands of armoured combat vehicles worldwide.

John Cockerill Defense is a global leader in advanced defence solutions, specializes in the development of innovative weapon systems and armoured vehicle technologies. With a strong heritage in military engineering, the company provides cutting-edge solutions to enhance operational capabilities and firepower for modern armed force. The 3030 manned turret is a modern TRL 9 military on-the-shelf solution, equipped with a 30mm ABM-capable weapon system and protected to Level 4 (STANAG 4569). Its unique fire support capability provides the user with 250 ready rounds, representing a 20%

increase in firepower compared to other competitors in this category. Over 300 units of these turrets have been produced, delivered, and deployed into service.

A Technologically Advanced Armored Vehicle Solution

This offer represents the most technologically advanced armoured vehicle system, specifically designed for cavalry operations and expeditionary forces' fire support.
